## NEVADA STATE JOURNAL

PRICE OF DAILY JOURNAL.  
FIFTEEN CENTS PER WEEK  
Delivered by Carrier.

TUESDAY, JANUARY 15, 1895.

### Old Time Methods

of treating  
Colds and  
Coughs were  
based on the  
idea of sup-  
pression. We  
now know  
that "feeding a  
cold" is good doctrine.

**Scott's Emulsion**  
of cod-liver oil with hypo-  
phosphites, a rich fat-food,  
cures the most stubborn  
cough when ordinary medi-  
cines have failed. Pleasant  
to take; easy to digest.  
Prepared by Scott & Evans, N. Y. All ingredients.

### BREVITIES.

Skates of all kinds at Lange & Schmitt's.

Cocktails made at the Arcade Saloon are out of sight.

Twenty cases of butter were shipped west last evening.

General Torreyson arrived from Gol-  
conda last evening.

W. E. Griffin was a passenger for California last evening.

A splendid line of crockery and glassware at Lange & Schmitt's.

Jack Caughlin, the genial deputy sheriff, returned home last evening.

Mrs. Al Linn left on yesterday morn-  
ing V. & T. to join her husband in Carson.

All styles of hot drinks prepared in an artistic manner at the Arcade Saloon.

Thirteen cars of cattle for Ward and Cambon arrived on the N-C-O last evening.

L. O. Henderson, candidate for warden of the prison, arrived from Carson last night.

Mrs. Bigelow, wife of Chief Justice Bigelow, was a passenger for San Francisco last night.

Nineteen cars of cattle were shipped yesterday to the Western Meat Co. South San Francisco.

Bad weather has made it necessary to suspend work on the Sierra Valley narrow-gauge railroad.

For an exquisite cup of tea try a package of Souchong at P. Barnes & Co.'s cheap cash store.

She—And what would you be now if it weren't for my money? He—A Bach-  
elor.—Pall Mall Budget.

A fresh invoice of that fine mixed candy for 15 cents a pound at P. Barnes & Co.'s cheap cash store.

Go to Fredrick's jewelry store for the latest vocal and instrumental music at 10 cents per copy.

F. R. Ellis of the Woodland Mail is in town, called here by the serious illness of his brother-in-law, T. W. Boalt.

New York insurance authorities report the fire loss of 1894 in that city to be \$90,000 less than that of 1893.

Blankets and furs put away well sprinkled with borax and done up air tight will never be troubled with moths.

In New York the building plans submitted in 1894 numbered 2,600, calling for an expenditure of over \$51,000,000.

It was thought that there was a slight improvement in T. W. Boalt's condition yesterday, but he is still very low.

W. G. Thompson of Virginia City, late candidate for State Treasurer on the Democratic ticket, visited Reno yesterday.

Frozen oranges are being rushed into the Chicago market from Florida, where they are sold by the barrel for a mere song.

When carpets become spotted with grease a hot iron used over blotting paper will generally remove it. Benzine is also good.

McLean's patent swing rockers at E. C. Sessions & Co.'s new store in the Improvement building. The only permanent chairs made.

The Election Board at Lafayette, Ind., is being sued for \$10,000 for refusing to permit Mrs. Helen M. Gougar to vote at the last election.

A young blood of Condon, Or., tore up \$60 in bills and threw them into the stove the other day, just to show that he didn't care for money.

W. L. Salkeld, who has been examining mines at Silver Peak, in the interest of San Francisco parties, arrived on the V. & T. last night.

A social will be given at Library and Thompson's Hall on Friday evening next. Children performers will give an entertainment. See advertisement.

Senator Robert E. Skaggs of Elko arrived in town Sunday evening and left for Carson on yesterday's local. He is a man in the prime of life and thoroughly independent.

'Tis SOZODONT the whole world tries,  
'Tis SOZODONT which purifies  
The breath and mouth, and dirt defies,  
'Tis SOZODONT for which we cry,  
Sweet SOZODONT for which we sigh,  
Tis only SOZODONT which we buy.

### LOVELOCK ITEMS.

A New Flaming Mill and a Probable Branch Railroad—Woman Suffrage and Other Topics.

Five car-loads of hogs have been shipped from this point to San Francisco during the week at prices averaging \$12 1/2 cts. F. O. B.

Colonel Marzen expects to put 500 head into lard, ham and bacon, sufficient to supply the home demand during the coming season.

Two thousand steers belonging to Miller & Lux are on the road and are expected here daily to eat up the surplus hay left on the meadows. The farmers receive \$2 per head per month for feeding, which makes the hay not about \$3 25 per ton in the stack.

With wheat \$14 per ton, hay \$3 25, hogs \$12 1/2 cts, potatoes \$10 per ton and every mine in the county closed down, what is to become of the country?

The new flouring mill in township 27, N. R. 32, E. M. D. B. M. is nearing completion. The contractor, Mr. O'Brien, guarantees to have it in operation March 21, 1890. It is said that a branch railroad will be built to the mill, which is about five miles from Lovelock. This will be a great convenience for people living in that part of the valley. In these hard times it is necessary to mill the wheat at home in order to save transportation charges should this mill prove a success another mill will be built in town in the near future. We have two graveyards, why not two flour mills. One of each would be a great plenty for this part of the country, but some of our people do not believe in doing things by halves.

The matter of woman suffrage is receiving considerable attention here. Our wide awake merchant here, Mr. G. W. Peitier, is agitating the question and proposes to disfranchise all the men and give ladies full control of the politics of the country. We notice that George is becoming quite a general favorite among the ladies since the agitation of woman's rights, and with his good look a fable manners and general accomodating style, the L. C. Co. has captured nearly all the trade for feminine wearing apparel in the valley.

Everybody complains of hard times, doctors included. Physically we are in the best of health, but financially dead.

**ALFALFA.**  
The Douglass Mill Running Steadily and Paying Handsomely.

Ed. Robb, who has just returned from Silver Star District, gives very favorable reports of the mines. The Douglass Mill of five stamps is running steadily on ore from the various mines.

It is a custom mill and it reduces ore in fifty-ton lots at five dollars per ton. The ore is free and the process of reducing it is the simplest kind. It is crushed in a battery and run over plates. There are no pans and no use for them.

The principal mines are the Hard-  
as-a-nail, the New Party, the Oneida, the  
Direct and Murry. The ore from these  
mines yields from \$60 to \$100 at the  
mill. Besides these there are a dozen  
or more other mines that yield from

\$15 to \$30 at the mill.

There are about eighty miners in the  
district, many of whom have leased  
mines and are making good wages.

Provisions are abundant, but prices  
are higher than on the railroad. Board  
is furnished at \$1 per day. Wood is  
abundant, but pine, which makes ex-  
cellent fuel grows right over the mines  
and it sells, delivered at the mines, at  
\$5 per cord. There are five good  
springs of water in the vicinity, two of  
which are near the camp and supply  
the mill and the inhabitants with  
water.

The camp is about eight miles from  
Sodaville on the Carson & Colorado  
railroad. Ore from the Oneida mine  
is hauled by teams to Sodaville; thence  
shipped by rail to Kinkead, twelve  
miles, where it is worked. This mine  
is owned by Knapp & Co. and is con-  
sidered very valuable. The vein is  
small but rich.

The outlook for a permanent and  
prosperous mining camp is good. The  
formation is soft and in many of the  
mines the ore is decomposed and re-  
sembles corn meal.

**A MINT IN LINCOLN COUNTY.**

Token Money Issued by the De Lamar  
Company.

A mining Company in Lincoln  
county has assumed the coinage of  
money. Silver is scarce in the town  
and to supply the wants of the com-  
munity the De Lamar Company has  
had coins of the denominations of 12 1/2  
cents, 25 cents, 50 cents and one dollar  
struck. The coins state on their face  
that they will be redeemed at the of-  
fice of the mining company. The  
papers say they are a great convenience  
for merchants, business men and the  
public generally. They are very light,  
being made of aluminum, and pass as  
readily as if they were gold and silver.

What is to prevent mining companies  
or others where money is scarce from  
issuing token money made of silver  
and putting enough metal in the coin  
to make it equal to its face value? In  
that case if silver advanced in price  
the holder of the coin would not pre-  
sent it for redemption, and the com-  
pany would receive the market value  
of the silver at the time the coin was  
struck. It would certainly make  
money more plentiful, and, as was the  
case with greenbacks years ago in Ne-  
vada, the holder might keep the coins  
for speculative purposes.

It is claimed that the use of bicycles  
in Toledo, Ohio, has depreciated the  
value of electric street railway plants  
it that city \$1,500,000 during the past  
two years.

Pat Kerwin, Superintendent of the  
Gould & Curry and Best & Belcher  
mines, arrived from the East last night  
much improved in health.

Highest of all in Leavening Power.—Latest U. S. Govt Report

ABSOLUTELY PURE

### RAILROAD RUMORS.

Changes in the Personnel of the Officers  
of the Truckee Division.

The Wadsworth Dispatch says rumors  
of changes in the personnel of the rail-  
road officers of the Truckee Division  
have been flying thick and fast for  
several months. The latest is that

Master Mechanic G. H. Hunt is to re-  
tire next Tuesday and tread the loco-  
motive footboard on the Truckee division

as an engineer or a traveling engineer  
in future, while Master Mechanic  
Lukett will have charge of the motive  
department from Ogden to Truckee

with a sub-officer at Wadsworth, prob-  
ably Master Mechanic French of  
Bakersfield. As Mr. French has been

on the Truckee division before and  
does not like it, this change may not  
come to pass. The street gossips say

that Foreman Clippenger is to be trans-  
ferred to some point in California, and  
that John Swant will take Mr. Clip-  
penger's place here. Foreman Clippenger

may be transferred but doubt that he  
will be superseded by Mr. Swant; but  
this is a matter of individual opinion.

Chief Clerk Vorhees will be trans-  
ferred to Bakersfield—God's country.

Part of the foregoing news is

true and part is not and there will be  
nothing authentic until the official  
document announcing the changes is

received from the general office, San  
Francisco.

### GOLD-BUG REFORMS.

A Few Schemes Which They Would Like  
to see Consummated.

The retirement of the treasury notes  
from circulation and the issuance of  
\$500,000,000 three per cent bonds.

To sell the silver bullion in the U. S.  
Treasury at public auction to the highest  
bidder.

The imprisonment of debtors who  
default on their interest.

To borrow \$400,000,000 of gold from  
Europe and retire all the silver dollars  
from circulation.

To employ Rothschild to superintend  
the U. S. Treasury department and run  
on the European plan.

To establish an absolute monarchy,  
with Grover Cleveland as King and  
John Sherman as Prime Minister.

To allow the British army and navy  
to assist in the collection of interest  
due the European bondholders.

Reforms like this last have been in-  
augurated in Egypt and have furnished

the Egyptians with steady employment

in raising wheat and cotton to pay in-  
terest, and the cost of collection. The

presence of the British soldiers and  
ironclads, acts as a stimulant to the  
Egyptians, and the interest is collected  
without the aid of the courts, in fact

which is thoroughly appreciated by the  
bondholders.

**FARMER.** A Sad Death.

Norsanda Corsiglia died Sunday  
evening after a long and painful ill-  
ness. The patrons of the Palace Dry  
Goods House will remember him as the  
boy who for some time was employed

there as an errand boy. He was about  
17 years of age, although ill health had  
broken him down physically so that  
his small size made him look younger.

He was always polite and attentive and  
kept up at his work longer than he  
should have done. Mr. Levy finally  
insisted on him remaining at home  
until he should be better, and the little  
fellow went home with a sad heart, and  
was soon bedridden. He grew worse

and on Sunday evening death relieved  
him of his sufferings. He will be buried  
from the residence of his parents on  
Second street this afternoon at 2  
o'clock.

**The Cause of the Delay.**

The N-C-O. trains arrived Sunday  
morning at 9:30 o'clock having laid out  
all night near the Cold Springs waters

tank this side of Dry Lake. An at-  
tempt was made to sidetrack a part of

a cattle train, and in doing so the rails  
spread on the siding, dropping the engine  
down so it sank into the mud about three  
feet, and had to remain there until help  
could go from town. The boys report

having had a hard old night of it, the  
rain coming down in torrents. No  
serious damage was done.

**Staff Officers.**

The following appointments have  
been made and commissions issued by  
Governor Jones, commissaries to date

from January 5, 1895:

S. L. Lee, Colonel, Surgeon-General;

Jos. Marzen, Colonel, Chief Engineer;

John J. Crosby, Colonel, Paymaster-

General; Frank McCullough, Lieuten-

ant-Colonel, Aid-de-Camp; David A.

Bender, Lieutenant-Colonel, Aid-de-

Camp; Joseph A. Conboie, Lieutenant-

Colonel, Aid-de-Camp.

Some of the Tricks of So Called Mind Readers Solved by Dr. Hyslop.

Dr. Hyslop of Columbia college, says a writer in the Boston Herald, has helped to bring down several so called mind readers who have visited New York. The Taylors, a man and woman who gave exhibitions in New York two years ago and convinced nearly every one who saw them of the genuineness of their manifestations, gave a private seance for the benefit of this Columbia professor and some of his scientific friends. They found hidden objects, they picked out cards that had been selected from a pack and then shuffled in again, and all the other familiar tricks, with more than common success, one of them staying in the room and being in the secret, and the other coming in after all was ready and supposedly reading the partner's mind.

All went well until Dr. Hyslop and a confederate took the Taylors aback by announcing that they could do the same things. They had found that the words used by one of the "mind readers" in calling the other into the room were what gave the desired information. It was discovered that by skillful arrangement of not more than six words a surprising amount of information could be conveyed. This is the first time the fact that the Taylors were not genuine mind readers has been made public.

Another "mind reader" exposed by Dr. Hyslop and co-investigators was Guibal, who gave exhibitions in New York recently and astonished hundreds of persons, most of whom suppose to this day that his tricks were bona fide psychic phenomena. Guibal's assistant was a woman called Greville, who sat on the stage, and who, so far as could be seen for a long time, gave him absolutely no sign of what was in her mind. Guibal apparently read that mind as if it were an open book. The whole thing was found to be a trick, and the explanation is now in the archives of the Society for Psychical Research. It is believed that Guibal and Greville were the same persons whose performances had amazed London not long before. The woman breathed very heavily, and the code of signals lay in the manner of her breathing, messages being conveyed by long and short breaths, something like the dots and dashes in the Morse telegraph code.

CURIOS TEA PARTIES.

The Old and Eternal Little Functions That Are Held in Pearl Street.

There is an everlasting tea party in function on Pearl street, near Hanover square. An aroma of freshly steeped leaves fills the air all the week, and follows your nose to the cause you will find it pointing down to little gloomy basements where tea cups are perpetually spread. They are all plain white cups, and there is no display of table-cloth or dainty cakes—just plain tea. And the methods of the tea parties that together there are just as plain and uneventuous.

They generally consist of old gentlemen of severely respectable appearance, and when these old parties feel like it they go down the basement steps and take a pinch of tea out of a caddy or snifter, or whatever it may be kept in, and put it in the cup and pour a little hot water on it, but never any milk or sugar. And then, despite their extremely respectable air, they dip their fingers in the cups and stir the tea leaves about or maybe fish out a leaf and roll it, sometimes putting it in their mouth and chewing it.

But, strange thing of all, the old people drink their tea after all this a little they have taken with it. In fact, they seem to take a strong dislike to the infusion as soon as it is made. Sometimes they sniff at it, and if ever they take it into their mouths they roll it, but roll it around and spit it out. Moreover, they will do the same thing with half a dozen cups in succession, and Dr. Johnson—unless he lived to be 100—would have cried out at the waste of the cheering but uneventuous tea.

Meanwhile other gentlemen sit at the table and anony-mously watch this sniffling and spitting, for the tea is the tea to teas and samplers, and this is where a tea is bought and sold not by the pound, but by the earlour. —Now York Sun.

Lucky and Unlucky Vegetables.

Peas and beans are very important plants in folklore, and there are many operations connected with them. Peas were favorite instruments for civilization. A pea pod with nine peas was equal to a wishbone when placed above the door. In Northampton it is accounted generally lucky to find nine peas in a pod, or bud. In Melchiorburg, Germany, it is believed that peas must be sown early on Wednesday or Thursday, or the birds will carry them off. If they are fed to hens, it is said that fowls will lay well. They must not, however, be eaten during the Christmas holidays nor until after Twelfth day.

Beans were mysterious in antiquity. Pliny says they contain the souls of the dead. The Romans used them in religious ceremonies. They were used in Greece as balusters, and Pythagoras desired his disciples not to "love beans"—that is, not interfere with politics. Our place, "You don't know beans," probably means you are no politician. Ovid prescribes beans to expel evil spirits.—Philadelphia Press.

The Place For Shoppers.

"Please, brother! Is there any? Both of us!" is the earnest request which appears on the title page of the catalogue and price list of an enterprising firm of retail grocers in southern city. "It's a bright idea. They can well afford to be pestered with inquiries as to quality, price, etc. The only thing that they fear is to be left alone.—Merchants' Review.

The elephant is commonly supposed to be a slow, clumsy animal, but when excited or frightened can attain a speed of 20 miles an hour and keep it up for half a day.

One is Resembled.

Overseas—Do you know a man—no race always reminds me of a person in it?

Yes—How so?

Why the parties talk about it for months, but it only requires a couple of seconds for the event.—Yonkers
